

Temporal Binomial, Existential Binomial

diptych, foil on wall, 2022/2025

According to the commonly accepted convention of reading the binomial coefficient in Polish

$\binom{n}{k}$ is read as: "*n* po *k*" [*n* after *k*]

Therefore:

$\binom{e}{k}$ is read as: "*e* po *k*" – *epoka* [epoch] – i.e. "temporal binomial"

$\binom{o}{k}$ is read as: "*o* po *k*" – *opoka* [rock, pillar] – i.e. "existential binomial"
